SPECIALIST PRODUCTS

DECKING, BALUSTRADES AND GLASS STRUCTURES

DECKING AND BALUSTRADING

Composite decking complete with balustrading posts ready for glass installation.

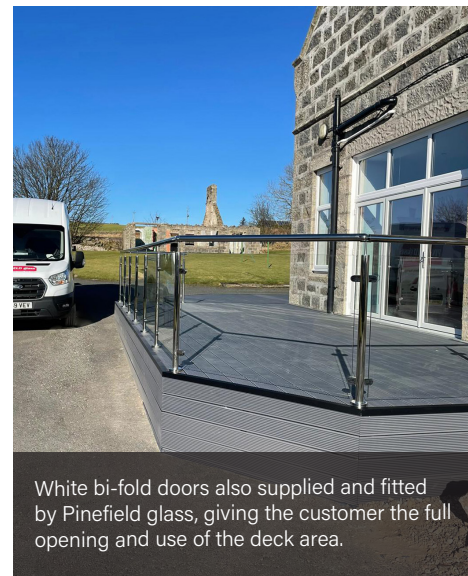

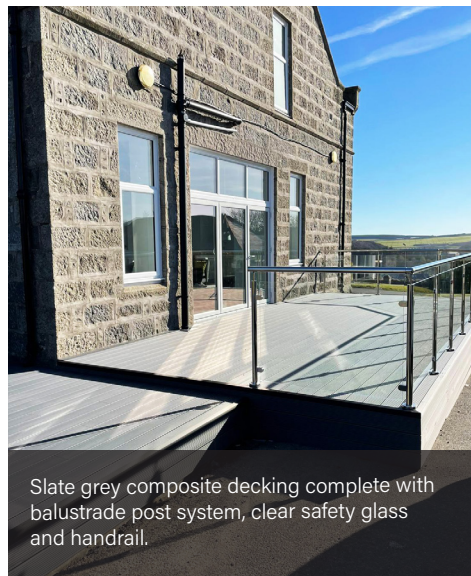

Composite decking complete with balustrade post system, handrail and safety glass.

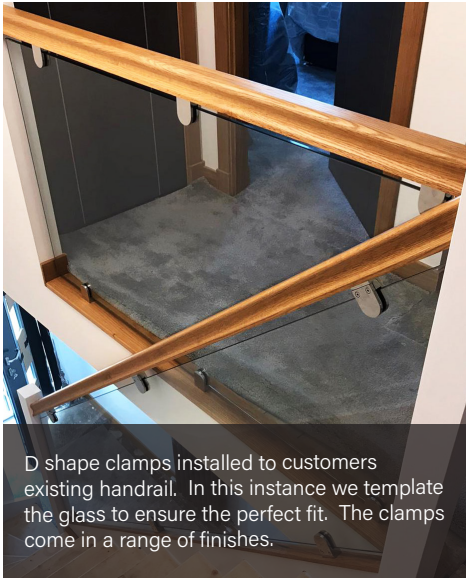

Our composite decking boards can be run horizontally or vertically based on the desired finish and are often used to form the steps.

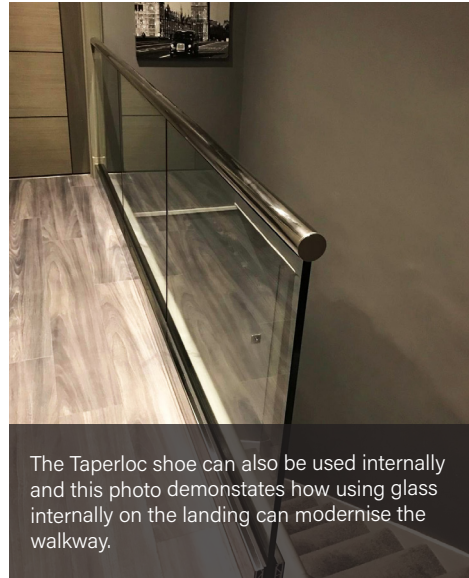

EXTERNAL BALUSTRADES, JULIET BALCONY AND DECKING

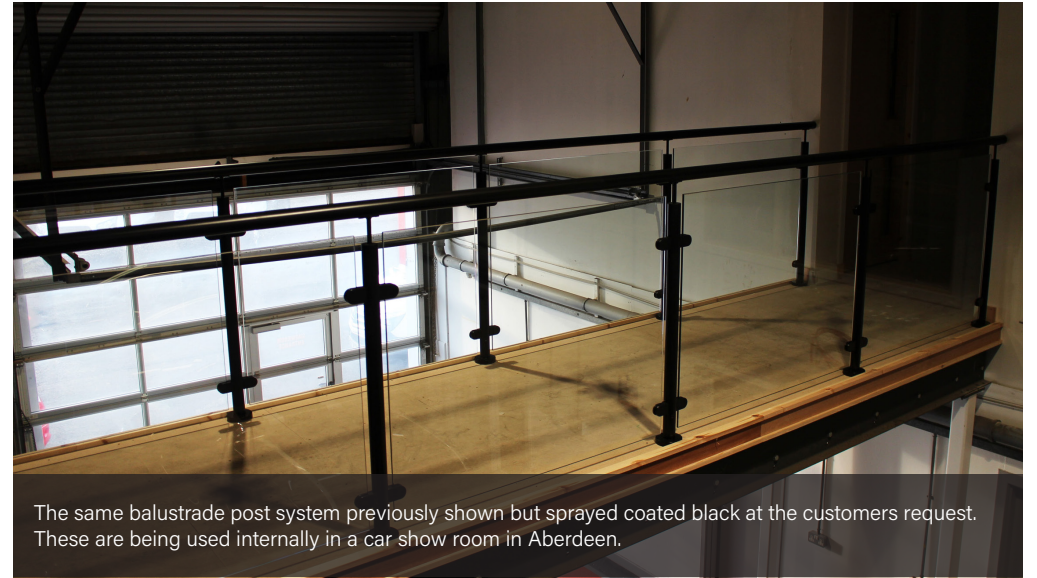

INTERNAL BALUSTRADES AND SHOWERSCREEN

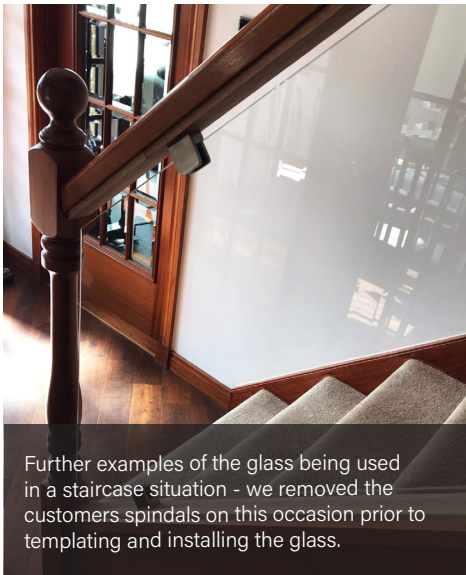

D shape clamps installed to customers existing handrail. In this instance we template the glass to ensure the perfect fit. The clamps come in a range of finishes.

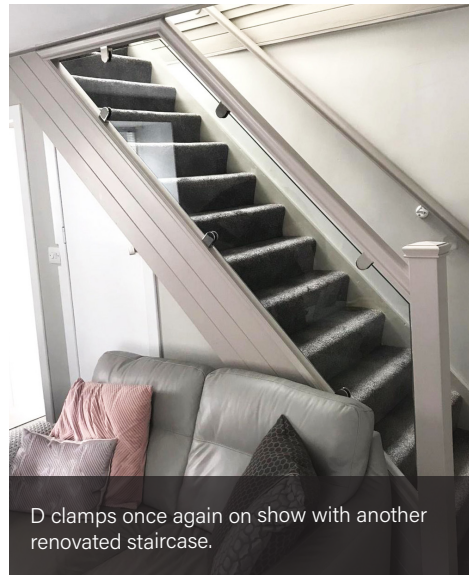

The Taperloc shoe can also be used internally and this photo demonstrates how using glass internally on the landing can modernise the walkway.

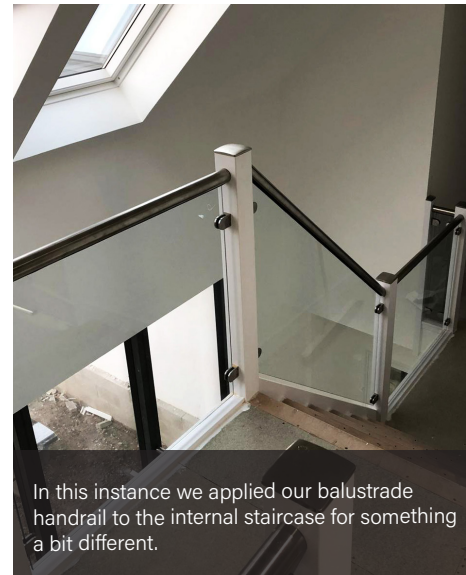

The same balustrade post system previously shown but sprayed coated black at the customers request. These are being used internally in a car show room in Aberdeen.

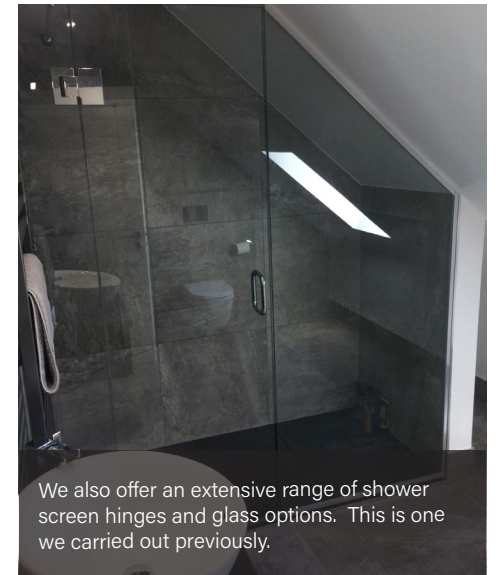

Further examples of the glass being used in a staircase situation - we removed the customers spindals on this occasion prior to templating and installing the glass.

D clamps once again on show with another renovated staircase.

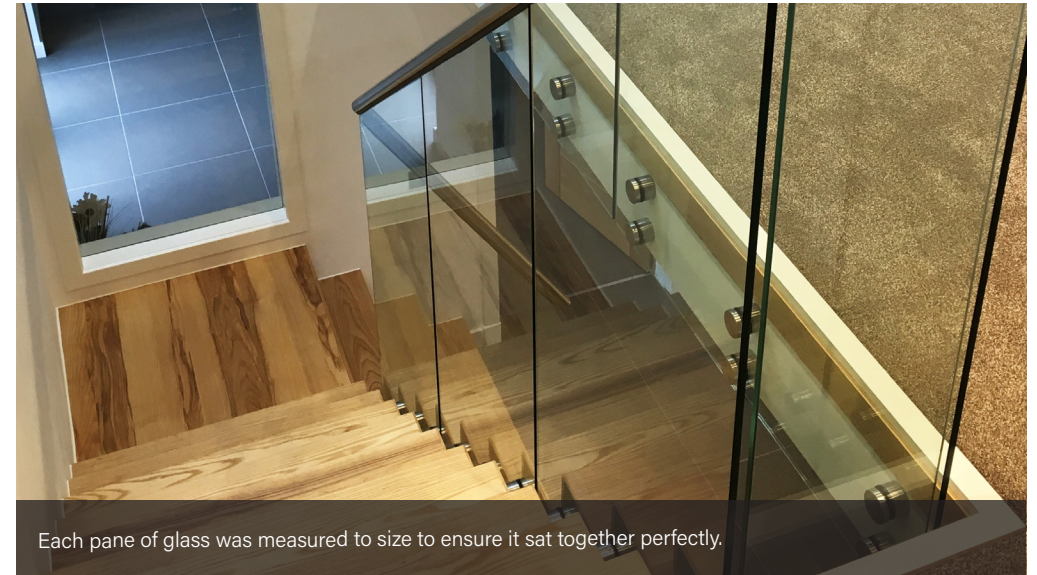

In this instance we applied our balustrade handrail to the internal staircase for something a bit different.

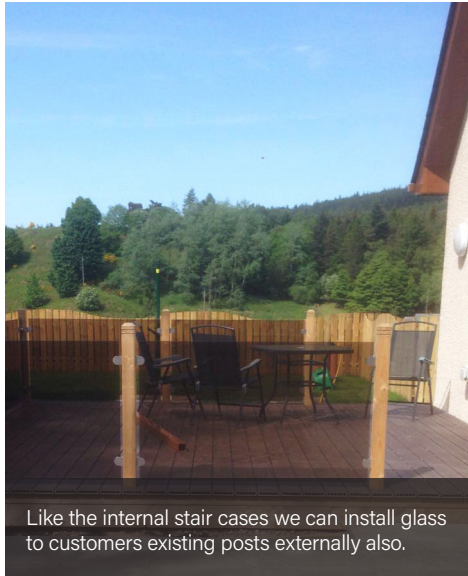

We also offer an extensive range of shower screen hinges and glass options. This is one we carried out previously.

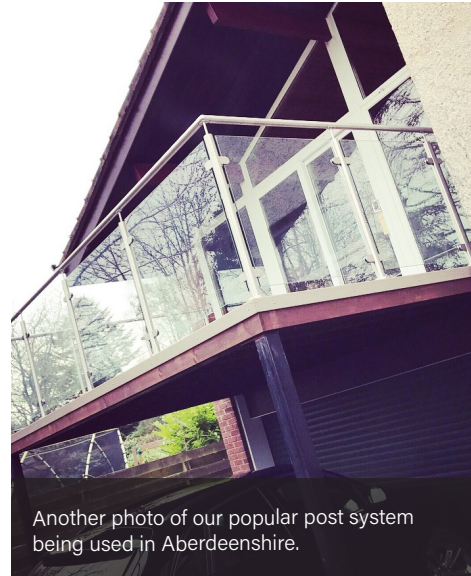

INTERNAL BALUSTRADES

EXTERNAL BALUSTRADES

Like the internal stair cases we can install glass to customers existing posts externally also.

Another photo of our popular post system being used in Aberdeenshire.

Moray Golf Course again on show as we removed the wired fencing between the posts and installed clear toughened safety glass to give the home owner the full view.

The Taperloc shoe and handrail being used in Forres to complete this garden area nicely.

PVCu windows also supplied by Pinefield Glass.

Another angle of the project above

EXTERNAL BALUSTRADES

Another good example of how our balustrade posts can modernise a garden.
